## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Group I drawn to claims 1-24 and 30 in Paper No. 8 dated November 25, 2002 is acknowledged. Applicant has traversed the restriction requirement on the grounds that the compounds of Group I are novel and unobvious and as such the methods of using said compounds are also novel and unobvious. Under 37 CFR §1.111, the applicant is required to specifically point out the reasons on which he or she bases his or her conclusions that a requirement to restrict is in error. A mere broad allegation that the requirement is in error does not comply with the requirement of this rule. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

The requirement is still deemed proper and is therefore maintained.

2. Applicant is further required to elect a single species drawn to one of the compounds as disclosed on pages 43-75 of the specification as set forth herein below:

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species selected from one of Preparations 1-29, even though this requirement is traversed.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
